

Rags In Bags

WIPE602 10 kg, 1 bag

These recycled, coloured sweatshirt Rags In Bags work great for many demanding tasks. They're soft, strong and have a high bulk, making them an excellent economical engineering Rag.

- Made out of recycled, post-consumer, cotton-rich sweatshirts
- Strong, bulky, highly absorbent material is ideal for wiping, soaking up spills, cleaning hands or any other application requiring both softness and strength
- Environmentally conscious products give old textiles a new life as strong and absorbent Rags, limiting the amount of textiles entering landfills
- All Rags are free of printing, metal content and areas of the garment that are not suitable for use such as cuffs and collars; every rag is usable
- Poly bag means there's no heavy packaging added into the final weight; you get more Rags than you would with box of equal weight
- Compression-packed to save storage space
- Typical industries include heavy engineering, powder coating, cable work, marine engineering and construction

Style	Laundered Before Processing
Colour	Varies
Recycled Content	100% Post-Consumer Recycled Textiles
Fabric	Reclaimed Sweatshirt Material
Typical Cut Rag Size	45cm x 45cm
Sold as	1 bag
Weight	10 kg
# per Pallet	60
Composition	Cotton rich material
Metal Content	Visually Inspected for Metal
