

210-Litre Drum Clamp

DRME260 For (1) 210 ltr. Open- & Tight-head Steel Drum, 1 each

Lift, transport and reposition drums without lifting a finger! The automatic jaws on this removable forklift Clamp let you grab, move and release a vertically standing 210L steel drum from the comfort of your driver's seat.

- Easy attachment and removal; Clamp slides over forklift prongs and is held in place by hand-tightened T-bolts
- Simply drive forklift forward with fingers aligned under rolling hoop of vertically standing drum; jaws automatically grab and lift drum as unit is raised and disengage when lowered into position
- Clamp lifts underneath rolling hoop to maximise grip and safety; the heavier the drum, the tighter the hold
- Durable epoxy finish withstands harsh industrial environments and helps prevent rusting
- Bolts and locknuts let you adjust drum fingers to ensure they are parallel before use
- Compatible with open-top or closed-head 210L steel drums

Specifications

Use With	(1) 210 ltr. Open- & Tight-head Steel Drum
