50cm H Floodstop Barrier Self-Filling Modular Unit

PLSE340 50cm x 100cm x 50cm

When the tide is against you, Floodstop Barrier Units use rising floodwaters to create a unique, innovative, quick-to-deploy flood defence barrier that helps protect utilities, businesses, and households from flooding.

– Safeguard small openings like driveways or protect expansive areas such as tidal promenades or river banks, these flood barriers offer versatile and effective flood protection
– Deploy in emergencies or use as a semi-permanent or permanent solution for flood defence, road traffic delineation, or reservoir system
– Works on hard standings such as roads, pavements, pathways, as well as grass or soil (not gravel)
– Self-balancing units with a unique foam gasket base create a seal with the ground - no anchoring required!
– These Self-Filling Units fill with rising floodwater that, when combined with a Weighted Connection Key (sold separately), means the assembled barrier is always denser than the flood water
– Combine with Pre-Fill Modular Units (sold separately), Multi-Hub Corner Units (sold separately), and Weighted Connection Keys (sold separately) to build an impenetrable defence
– Designed to handle a flow velocity of 0.5m/s and withstand strong winds when deployed
– Complies with health and safety lifting regulations - easy and rapid one-person assembly
– Units empty as floodwaters recede, making them light enough to be carried away
– Economical solution - Floodstop Barriers, unlike sandbags, are reusable time and time again
– Easy to store and ship; nestable units fit 10/pallet, and up to 150m of barrier (unpalletised) in a 20' x 8'x 8' container
– Perfect flood protection solution for domestic and commercial doorways, driveways, perimeters, garage/roller shutter doors; Local Authorities, & Utilities flood protection; and Spillage Protection (fluid containment, tertiary containment, slurry containment)
– Flood insurance is becoming increasingly

difficult to obtain; Floodstop Barrier Pods can help home & business owners protect their properties from floodwaters and maintain insurance coverage

–

– NOTE: It is recommended every 3rd unit in your barrier should be a Pre-Fill style for maximum stability. Pre-Fill Floodstop Barrier Units are available to order separately as item# PLSE341. Units are typically made-to-order. To ensure protection is in place well ahead of any anticipated flooding, we recommend planning and ordering at least six weeks (or more) in advance.
