

Absorbent Granule Shaker Bottles

PLPE300 For Urine and Vomit, Absorbs up to 48 L per box, 12 each

Absorbent Granules are a special blend of absorbents that will quickly and effectively contain and absorb non-blood-stained body fluid spillages of vomit and urine.

- This special formulation allows the granules and any solid matter to be easily scooped up and removed to a waste bag with ease
- Granules can be used on all surface types and will not bleach soft furnishings or fabrics
- The non-chlorine based granules avoid creating unpleasant odours when used on urine or vomit spills
- Granules are non-hazardous and high absorbency; each shaker bottle will absorb 300-400mL, depending on spill viscosity
- Ideal for use in healthcare facilities, schools, nurseries, residential care homes and other facilities where urine and vomit spillages are a frequent occurrence
- Enable rapid removal of urine and vomit spillages without spreading
- Highly stable; granules have a 3 year shelf-life
- Note: Not to be used on chemical spillages or spillages visibly containing blood.

Colour	White
Fluids Absorbed	Urine and Vomit
Absorbency	Up to 48 L per box
Sold as	12 per box
Weight	1.7 kg
# per Pallet	72
Composition	Perlite, Sodium polyacrylate
