Acid Neutralising Powder Shaker Bottles

PLPE301 2 - 500cc Shaker Bottles, Acids, Powder

Designed for the containment and clean-up of acid spills, this Acid Neutralising Powder changes colour to indicate when the spillage is safe to remove.

- The Neutralising Powder will turn red when the acid spillage is completely neutralised
- Packaged in a shaker bottle for easy application, simply apply powder to acid spillages slowly from the outside to the centre
- Once neutralisation is complete, and if permitted, the mixture can be flushed away with water without damage to the environment
- Alternatively, collect granule/spill mixture and dispose according to your organisational policy
- Each 500cc shaker bottle will neutralise up to 250ml of 96% Sulphuric acid, up to 275ml of 85% Phosphoric acid, up to 1.25L of 30% Hydrochloric acid, or up to 1L of Battery acid
