

Ampho-Mag™ Neutraliser

PLP217 6 - 3 lb. Shaker Bottles, Acids & Caustics, Powder

Ampho-Mag Neutraliser instantly changes colour to help you safely respond: blue for caustics, red for acids and yellow/green when neutralised.

- Powder turns red when it comes in contact with acid (sulfuric acid is often mistaken for water, making it the number one material for accidental injury)
- Ampho-Mag turns blue on contact with a caustic
- Safely neutralised chemical spills turn green/yellow
- Packaged in a shaker bottle for easy application
- Shelf life can vary dependant on a number of factors, such as exposure to UV, humidity, moisture and exposure to chemicals; when kept sealed in the original packaging and stored in normal, dry conditions the shelf life of this product is indefinite; once opened, the shelf life of this product is approx. 6 months, provided the product is kept closed within the original packaging between uses and is stored in normal dry conditions

Specifications

Colour	White
Form	Powder
Neutralises	Acids & Caustics
Sold as	6 per box
Weight	8.6 kg
# per Pallet	84
Composition	Amphoteric material
Volume	3 lb. Shaker Bottle
