

Best N-DEX® Plus Gloves

BES0004 8 mil Tips/8 mil Palm, Industrial Grade, No Texture

Get the dexterity and protection of latex with the resistance and nonallergenic features of PVC/vinyl in one industrial grade disposable! Lightly powdered nitrile gloves protect hands from grime or chemicals, and they go on quickly and easily.

- Cost-effective disposables protect from grease, grime, food and chemicals without the worry of ruining good gloves; they offer light protection, sensitivity and dexterity with use-and-toss convenience
- Non-allergenic nitrile is more chemical-resistant than latex to guard against intermittent contact and splashes; resists puncture and abrasion better than PVC/vinyl
- Light dusting of powder helps gloves slide on effortlessly; absorbs perspiration for drier hands
- Non-sterile industrial grade; affordable, yet effective, barrier to keep dirt or mild chemicals away from hands
- Beaded cuff helps prevent ripping and create a better seal
- Ambidextrous design simplifies inventory; replace only one glove at a time, when needed, to reduce waste
- Thin enough to use as a liner under another glove for a liquid- and dirt-proof barrier
- Ideal for assembly, repair, electronics, quality control, chemicals, laboratories and more

Specifications

Colour	Blue
Dimensions	24cm L
Texture	No Texture
Sold as	50 per dispenser
Weight	0.6 kg
Composition	Nitrile Shelf Life - 5 Years if Stored in a Cool, Dark, Dry Place
Grade	Industrial
