

EnviroPad

FLTE706 137cm x 218cm, 1 each

EnviroPad retains and 'locks in' hydrocarbons into the polymer, significantly reducing the risk of pollution entering the environment.

- A smart membrane with unique polymer technology captures and retains oily spills and drips to non-detectable levels
- Oil, diesel and petrol are immobilised into a non-leaching, dry, rubber-like mass, immobilising it permanently and preventing it from leaking hydrocarbons into the environment
- A hybrid of two layers of geo-textile with polymers embedded between the layers, it creates a filtration fabric to encapsulate and solidify hydrocarbons and allows water to pass through
- Suitable for both outdoor and indoor usage, absorbs oils and fuels but not water
- Lightweight, can be easily rolled and stored, EnviroPad is ideal to use in place of traditional drip trays
- Large items of plant and equipment can be easily wheeled or placed onto the EnviroPad
- Use with pumps, generators, chain saws, cut-off saws and other oil or petrol-filled construction machinery

Specifications

Colour	White, green & orange
Dimensions	137cm W x 218cm L
Fluids Absorbed	Oil-Based Liquids But Not Water
Absorbency	Up to 25 L
Perforated	Not Perforated
Sold as	1 each
Weight	5.7 kg
# per Pallet	24
Composition	Geotextile membrane with C.I.Agent® polymers
Packaging	Bag
Poly-Backing	Yes
UV Resistant	No
