

Ezi-Action® 210-Litre Drum Pump

PMPE131 For Oil Based Liquids, Detergents & Mild Corrosives, 400mL/Stroke, Fits 210 ltr. Drum w/ 2" Trisure/BCS/Mauser Bung

Ezi-Action pumps are chemical resistant, robust hand pumps for the transfer of liquids from drums and containers. The revolutionary double action design provides effortless pumping with no critical parts to wear or jam.

- Liquid is efficiently dispensed in volume on the up and the down stroke, at a safe low pressure
- This pump can handle some acids, strong alkalis, cleaning chemicals, lubricants, diesel (including AdBlue/DEF), liquid food products and viscous liquids up to 8,800 centipoise
- Constructed from high quality FDA compliant polypropylene with seals and flap valves of high quality LDPE
- None of these components need to be changed when pumping different liquids
- Ezi-Action drum pumps are designed to sit on the base of the container and empty all contents
- A choice of adaptor fitting options are available to enable correct connection to the container
- Anti-pumping safety strap is fitted to secure the contents of the vessel when the pump is not in use
- Add an Ezi-Action Safety Measure Kit (sold separately) to provide a totally enclosed system of calibrated dispensing and decanting of liquids

Use With	Oil Based Liquids, Detergents & Mild Corrosives
Style	Piston Operated
Colour	White
Sold as	1 each
Weight	0.7 kg
Composition	FDA compliant polypropylene with LDPE seals
Fits	210 ltr. Drum w/ 2" Trisure/BCS/Mauser Bung

Maximum Flow Rate

400mL/Stroke

Maximum Viscosity

8,800 Centipoise
