

FloodSax® Commercial Pack

PLSE321 48cm x 56cm x 3cm

FloodSax® are a self-inflating flood defence system used to protect your home and business from storms, flash floods and accidental water damage.

- Lightweight (dry) product is easy to carry, store and deploy. A box of 20 can be carried by one person and hundreds can be transported to a flood scene by one person in a car or van
- Simple to use just soak with water from the sink, hosepipe, watering can or even the floodwater itself, and the bag will expand by absorbing water to become taut and puncture–proof within five minutes
- Semi-porous inner liner, with strong internal and external stitching, contains absorbent crystals which absorbs up to 22 litres of water in just 3-5 minutes and will stay energised for up to 12 weeks if in contact with liquid without leaking any polymer gel
- Once the water is absorbed, it stays there and the bags act just like 22kg sandbags to effectively keep floods at bay - protecting your home and business from storms, flash floods and accidental water damage
- Designed to mould into doorways to keep floodwater out, divert liquid flows or can be built up as walls up to one metre high to stop larger floods
- FloodSax® are biodegradable and can be disposed of in landfill sites once the floodwater has subsided
- Vacuum packed, with a 5 year shelf life
- Can be used internally and externally, and will absorb many different types liquids, like hydrocarbons, not just water
- Case contains 4 vacuum packs of 5 FloodSax®

Specifications

Colour	\M\bita
Colour	White
Dimensions	48cm W x 56cm L x 3cm H
Fluids Absorbed	Water-based liquids
Absorbency	Up to 440 L per case
Sold as	4 packages per case
Weight	14.5 kg
# per Pallet	20

Composition

Polypropylene outer with cellulose and superabsorbent polymer filler
