Multi-Use Cytotoxic Drug Spill Kit

KITE371 Absorbs up to .6 L, 1 each

The Cytotoxic Drug Spill Kit provides all the necessary equipment needed to simply and safely clean up and dispose of spills.

– Multi-Use Cytotoxic Drug Spill Kit is designed for large spillages and areas where cytotoxic drugs are frequently handled
– Cytotoxic drugs contain chemicals that are toxic to human cells, meaning spillages pose a significant risk if appropriate measures for promptly dealing with the spillages are not available
– Kit contains everything required for both liquid and powder spillages in one case that can be easily carried to the spill location
– The kit contains inert CT-Zorb Granules which quickly and efficiently absorb a liquid spillage and prevent it from spreading; each shaker bottle will absorb a minimum of 300mL; included Scoops & Scrapers, and clinical waste bags, allow the granules to be easily recovered with a minimum of fuss
– The included absorbent pads provide a simple method for collecting powder spillages when used with the sterile saline pods
– Cytotoxic Drug Spill Kit id ideal for use in healthcare settings including hospitals, oncology facilities, hospices and care homes
– Note: Not to be used for blood or blood-stained body fluid spillages.
