

PIG® Absorb-&-Lock™ Ceiling Leak Catcher Kit

WTR026 For Water, For Ceiling Leaks

Quickly respond to roof and ceiling leaks and drips to protect employees and visitors from slips, trips and falls with an easy to deploy, high visibility water collection container.

- Collect and retain water from overhead leaks before they cause a dangerous slip hazard; quick and easy to set up in event of emergency roof and ceiling leaks to keep your floors clean and safe
- Hi-viz yellow container with printed caution label draws attention to the leak area; eliminates the needs for additional rubbish bins, buckets, tapes, cones and other objects to identify a leak area
- Line the assembled leak catcher with a clear liner (included), then place a water absorbent pad (included) inside the container before placing it under the leak
- Assembled catcher with water absorbing pad inside absorbs up to 3.8-litres of water; locking bottom prevents tip overs and keeps container in place
- Store extra pads and liners underneath the liner and pad in use for a quick change-out or for the next use
- Pops open for easy assembly and folds flat for storage
- Contains handles for easy transport; liner holders keep the saturated pad in place
- Dispose by lifting liner and saturated water absorbent pad from the container; no dumping or dragging the container to the drain
- Ideal for retail stores, restaurants, office buildings, shopping centres, exhibition centres, hospitals, hotels and airports
- Includes hi-viz leak catcher with anti-slip strips, (3) clear liners and (3) water absorbent pads

Specifications

Includes

(3) Absorbent Pads; (3) Disposal Bags; (1) Foldable Poly Container

Colour	Yellow
Dimensions	41cm W x 41cm L x 61cm H
Fluids Absorbed	Water
Absorbency	Up to 3.8 L
Sold as	1 each
Weight	1.62 kg
# per Pallet	171
Composition	Liner- High-Density Polyethylene; Container- Polypropylene; Water Absorbing Pads - Polypropylene and Super Absorbent Polymer (SAP)
Application	Ceiling Leaks
