

PIG® Absorb-&-Lock XL High-Visibility Water Absorbent Pad

WTR017 For Water, For Leak-Prone, High-Traffic Areas

Use these extra-large high-visibility water absorbing pads to absorb high volume leaks and drips in problem areas or use them during a spill response to clean up large volumes of water quickly.

- Extra-large water absorbing pads can absorb high volume leaks from pipes, equipment, appliances or machinery or used to clean up a large water spill due to overflows or pipe bursts
- XL pads cover a wider surface area and absorb water fast; perfect for spill response in hospitals, retail environments or areas of your facility with high customer or employee foot traffic
- Super Absorbent Polymer (SAP) filler swells on contact with water and expands to pull in large volumes of liquid quickly
- Expanded water spill pads create a barrier to help prevent further leaks and drips from escaping and spreading into walkways
- Absorbed water is ""locked"" inside; won't leach or run out when you pick up or dispose, even when fully saturated
- Pads (before water contact) are low-profile to fit tight spaces and lay flat for storage; unobtrusive design won't create trip hazard
- Non-toxic and non-hazardous for easy disposal
- Bright orange colour and printed ""Caution"" symbol add safety
- Leave pad down until fully saturated, then dispose. Do not drag or drop

Height when fully saturated	5cm
Includes	(10) 99cm x 37cm Pads

Colour	Orange
Dimensions	37cm W x 99cm L
Fluids Absorbed	Water
Absorbency	Up to 185.5 L per package
Sold as	10 per package
Weight	1.4 kg
Composition	Skin - Polypropylene; Filler - Super Absorbent Polymer (SAP)
Application	Leak-Prone, High-Traffic Areas
