

## PIG® Base/Caustic Encapsulating/Neutralising Mat

MAT353 28cm x 30cm, 25 pads

Absorb, encapsulate and neutralise corrosives in one easy step for safer spill cleanup. Colour indication identifies the best time to handle.

- Encapsulate and neutralise common caustics; great for cleaning up spills in areas where chemicals are stored, mixed or transported
- Colour changes on contact with caustics, then remains in a colour-changed state when neutralisation is complete; helps identify the best time to handle with the least amount of risk
- Instantly absorbs up to 50% concentrations of potassium hydroxide and other strong chemical caustics
- Gelling agents solidify caustics during neutralisation; prevents them from leaching out of mat
