

PIG® Build-A-Berm® Barrier Bladder Section

PLR517 18cm x 112cm x 10cm, 1 each

Add this special bladder section to your 10cm Build-A-Berm system for additional containment capacity - without increasing your footprint or wall height.

- Bladder expands to provide 210-litres of containment in addition to the capacity of your 10cmH Build-A-Berm system perimeter
- Helps you meet containment regs without increasing the footprint or wall height of your barrier system (bladder deployment requires an area of 168cm x 147cm)
- Build new or retrofit your existing 10cmH Build-A-Berm system; cut to length with utility knife, secure to floor with sealant (PTYL301), then seal seams
- Durable, 18 oz. all-vinyl covering resists oils, coolants and most chemicals
- Black colour identifies bladder section between standard yellow sections
- Clearly labelled to remind workers not to walk on, drive over or block flap where bladder deploys
- Easy removal requires only a flat-bladed shovel
- Great for use around leak-prone areas where you can't expand into aisles or you're up against a wall

Specifications

Style	Non-Weight Bearing
Colour	Black
Dimensions	18cm W x 112cm L x 10cm H
Intended For	Use on Smooth Surface
Temperature Limit	-30°C (-22°F) to 71°C (160°F)
Sold as	1 each
Weight	1.6 kg
New Pig Patent	9,181,669
# per Pallet	80
Composition	18 oz PVC covering

Polyethylene bladder

Acrylic resin support
