PIG® Drive-Over Build-A-Berm® Barrier 45° Vented Corner

PLR141 30cm x 48cm x 5cm, 2 each

Customise a semi-permanent barrier layout, and then drive over it! Use these drive-over 45-degree corners as part of your design, along with our PIG Spill Berms, and contain spills around your unique machinery setup or storage area.

- The Drive-Over Barrier provides semi-permanent containment in high-traffic areas on concrete, tarmac or most sealed surfaces
- Create any configuration by combining with other Build-A-Berm components; ends overlap and can be sealed together for liquid-proof containment
- Durable enough to withstand indoor or outdoor traffic from trucks, loaded tow motors and other heavy vehicles
- Constructed of 40 oz, vinyl-coated fabric with an open-cell foam core; berm compresses to approximately 6mm when driven over; springs back to shape when vehicles pass
- When used with standard high-visibility yellow Build-A-Berm Barriers, orange colour indicates area where drivers can enter and exit
- Vent allows built-up air pressure caused by heavy vehicles driving over connected heavy-duty sections to escape without rupturing the seams of your barrier
- Secure to floor with sealant (sold separately) and reinforce with predrilled aluminium mounting strips (included) and steel anchors (included)
- Join two Drive-Over Build-A-Berm straight sections at a 45-degree angle (sold separately)

Style	Drive-over
Colour	Orange
Dimensions	30cm W x 48cm L x 5cm H

Intended For	Use on Smooth Surface
Temperature Limit	-30°C (-22°F) to 71°C (160°F)
Sold as	2 per box
Weight	14 kg
# per Pallet	204
Composition	40 oz. Vinyl-Coated Fabric with Open-Cell Polyurethane Foam Core; Aluminium Fastening Strips; Galvanised Steel Anchors
Includes	1 - PIG® Drive-Over Build-A-Berm® Barrier 45° Vented Corner 4 - Long Mounting Strips 4 - Short Mounting Strips 16 - 2.5mm x 40mm Anchors
