PIG® Drive-Over Build-A-Berm® Barrier T-Connector

PLR135 30cm x 44cm x 5cm, 1 each

Use these drive-over T Connectors, along with our PIG Spill Berms and Corners, and contain spills around your unique machinery setup or storage area. Includes the option for dual containment areas separated by a shared centre line.

- The Drive-Over Barrier provides semi-permanent containment in high-traffic areas on concrete, tarmac or most sealed surfaces
- Create any configuration by combining with other Build-A-Berm components; ends overlap and can be sealed together for liquid-proof containment
- Can be used to help create two separate containment areas with a shared centre line in order to take up less floor space
- Durable enough to withstand indoor or outdoor traffic from trucks, loaded tow motors and other heavy vehicles with sufficient ground clearance
- Constructed of 40 oz, vinyl-coated fabric with an open-cell foam core; berm compresses to approximately 6mm when driven over; springs back to shape when vehicles pass
- When used with standard high-visibility yellow Build-A-Berm Barriers, orange colour indicates area where drivers can enter and exit
- Secure to floor with sealant (sold separately) and reinforce with predrilled aluminium mounting strips (included) and steel anchors (included)

Style	Drive-over
Colour	Orange
Dimensions	30cm W x 44cm L x 5cm H
Intended For	Use on Smooth Surface
Temperature Limit	-30°C (-22°F) to 71°C (160°F)

Sold as	1 per box
Weight	1.25 kg
# per Pallet	72
Composition	40 oz. Vinyl-Coated Fabric with Open-Cell Polyurethane Foam Core; Aluminium Fastening Strips; Galvanised Steel Anchors
Includes	1 - PIG® Drive-Over Build-A-Berm® Barrier T-Connector 2 - Long Mounting Strips 8 - Short Mounting Strips 24 - 2.5mm x 40mm Anchors
