# PIG® Drive-Over Build-A-Berm® Barrier

PLR283 14cm x 366cm x 5cm, 1 each

Heavy-duty barrier springs back into shape when heavy vehicles pass. Custom containment berm helps you control liquids in high-traffic areas.

- The PIG Drive-Over Build-A-Berm Barrier provides semi-permanent containment in high-traffic areas on concrete, asphalt or most sealed surfaces
- Constructed of vinyl-coated fabric with an open-cell foam core; berm compresses to approximately 6mm when driven over; springs back to shape when vehicles pass
- Durable enough to withstand indoor or outdoor traffic from trucks, loaded tow motors and other heavy vehicles with sufficient ground clearance
- Pre-drilled aluminium mounting strips with steel anchors secure berm to most surfaces; remove anchors to reposition, then seal with caulking (not included)
- Create any configuration by combining with other Build-A-Berm components; ends overlap and can be sealed together for liquid-proof containment
- When used with standard Build-A-Berm Barriers, orange colour indicates area where drivers can enter and exit
