

PIG® Drum Overfill Preventer

DRM919 For PIG® Burpless® Steel Drum Funnel

Add this handy extra to your steel PIG Burpless Funnel to avoid overfill mess and danger.

- Two-piece adapter acts as a shutoff valve, automatically closing off a 210-litre drum at 202-litres full
- When liquid in the drum reaches the preventer, the funnel stops draining and starts to fill, signaling you to stop pouring
- To drain funnel contents into the space still in the drum, simply twist it and the preventer counterclockwise
- Corrosion-resistant brass construction can be used with nearly any liquid
