

# PIG® Essentials Cellulose Fibre Loose Absorbent

PLPE240 For Oils, Coolants, Solvents & Water, Absorbs up to 24 L, 1 bag

More than three times more absorbent than typical clay granules means you'll use less material for spill clean up, reducing your labour and disposal costs.

- • European-sourced, post-consumer recycled cellulose is carefully blended, processed into pellets, and then crushed to create the optimum bulk density for absorbent performance
- • Non-abrasive composition won't harm finished floors or damage expensive machinery
- • Environmentally conscious recycled material reduces the amount of waste entering landfills
- • Absorbs and retains oils, coolants, solvents and water
- • Ideal when “green” products are desired or required as part of your EMS
- • Can be incinerated after use to reduce waste and to recover energy
- • Lightweight 8kg bag is easy to handle
