

PIG® Five-IBC Modular Spill Pallet

PAKE133 Holds (5) 1000 ltr. IBCs, 1420 L Sump Capacity, 20410 kg Load Capacity

Expandable Modular unit minimises IBC storage cost and features low deck height for easier loading.

- Cut your costs for storing multiple IBC units in compliance with regulations; a PIG® Multi-IBC Modular Spill Pallet provides capacity more economically than individual storage units. Flow-through connections let individual components share sump capacity to help you meet storage regulations. The connectable design also allows an easy-loading 22cm deck height.
- Includes five 284L pallet sections; connected unit provides 1,420L of total capacity to help you meet secondary containment requirements for five 1,000L IBC units
- Increase sump capacity by connecting on an individual pallet section or Expansion Tank
- Includes four pairs of 5.7cm diameter, flow-through Bulkhead Fittings that let you easily connect components; additional Fittings sold separately
- Includes specially-designed Tool Kit for connecting components
- Each heavy-duty pallet section supports 4,082kg UDL and measures 159cm square—accommodates all 1,000L IBC units
- Each pallet section features 4-way forklift pockets for easy moving, plus anti-slip grates that lift out for easy access to sump
- Pallet sections are 100% polyethylene to resist corrosion and most chemicals, including acids, solvents and oils
