PIG® HazMat Chemical Absorbent Dike

HA1010 13cm x 3m, Absorbs up to 68 L per box, 2 socks

Your biggest spills require the stopping power of our large-diameter hazmat dikes.

– Absorbs the widest range of acids, caustics and unknown liquids, even those with high concentrations like 98% sulfuric acid and 30% sodium hydroxide
– Chemical-resistant dike won't degrade or cause a dangerous reaction upon contact with corrosive spills
– Excellent for quickly diking and stopping the spread of larger chemical spills; for diking smaller chemical spills, consider our smaller diameter PIG HazMat Socks
– Polypropylene skin resists chemicals and tearing; reduces dust and holds in liquid, even when saturated
– Polypropylene filler is highly absorbent for containing corrosive or reactive spills
– Absorbs and retains most acids, caustics and unknown liquids
– Pink colour is easily distinguishable to assure workers use the correct dike during a spill emergency
– Can be incinerated after use to reduce waste

Colour	Pink
Dimensions	ext. dia. 13cm x 3m L
Fluids Absorbed	Acids, Caustics & Unknowns
Absorbency	Up to 68 L per box
Sold as	2 socks per box
Weight	6.8 kg
# per Pallet	30
Composition	Skin & Filler - Polypropylene
