

PIG® Heavy-Duty Oil Containment Boom

BOME230 25cm Freeboard, 50cm Draft, 10000kg Break Strength

A lightweight, floating Boom used to contain and control the spread of debris and waterborne spills, like oil and fuel. Used for quick response and preventative deployment during oil based spills in all water types, including open seas.

- The PIG® Heavy-Duty Oil Containment Boom is our strongest oil Containment Boom and can withstand a force of up to 10,000 kg!
- Compact flat boom is easy to store in a standard 40ft container (400m / container) or on a dispensing reel (available to custom order)
- The float design in the PIG® Heavy-Duty Oil Containment Boom is flat, so that the boom only requires limited storage space
- Can be deployed from the back on a boat by hand, or a crane can be used to deploy the boom as this heavy-duty boom can withstand the force of a moving boat
- PVC material is strong & durable. and also has a smooth surface finish making it easy to decontaminate after use
- Strong, aluminium ASTM-couplings allow multiple units to be easily and securely linked together
- Floats are constructed of closed cell foam ensuring they stay water-repellant indefinitely during use
- Standard booms use galvanised chain which is ideal for freshwater deployment, and will resist corrosion for up to 6-months of continuous deployment in sea water
