

PIG® High-Reach Roof Leak Diverter Tarp Kit

TLS820 69cm x 89cm

Ceiling leak in a heavy foot-traffic area, but unable to reach or attach a leak diverter to the ceiling? Funnel the leak safely, without diminishing the style of your space, through this high-reach leak diverter.

- Quickly route small leaks from high ceilings that have difficult access and no attachment points by using this telescoping high-reach leak diverter
- Maintain a professional look in customer-facing areas of your hotel, airport, hospital, school or elsewhere with this stylish alternative to bins, trays and other makeshift solutions; a lidded 19-litre pail also prevents passers-by from mistakenly dropping items in
- Trust the safe design in heavy foot-traffic areas, from the sturdy, hard-to-tip weight distribution to the high-visibility yellow legs and Caution message that warn pedestrians and prevent tripping
- Rely on the range of thoughtful functions when an emergency roof leak suddenly begins dripping, including a telescoping pole that adjusts to 274cm high so one person can set it up easily without a ladder, and an extra-large drain opening with anti-clog debris cage for reliability
- Capture drips from ceilings up to 4.5m high without risk of splash-out; for ceilings over 4.5m high, catch splashes with included mat pad
- Effortlessly take down and store by collapsing the pole to just 127cm, removing the convenient drainage plug and emptying the pail from the drainage-hose cutout without removing the lid
- Count on the heavy-duty vinyl-coated tarp—that resists punctures, UV and mildew—to last over repeated uses and stay ready for the next leaky roof

Item#	Description	Dimensions	Weight
TLS820-BK	Black	69cm W x 89cm L	5.5 kg
