

PIG® Static-Dissipative Absorbent Sock

SKM701 8cm x 3m, Absorbs up to 57 L per box, 6 socks

This is the ONLY absorbent sock for fuels and solvents proven to dissipate static, making it safer for use when cleaning up volatile spills.

- Reduces the risk of electrostatic discharge, a critical precaution around flammable liquids and vapours
- Absorbs and retains oil-based solvents and fuels — including acetone, benzene, petrol, toluene, xylene, mineral spirits and jet fuels but not water
- Spunbond polypropylene skin is UV resistant up to 12 months
- Filler and skin are 100% static-dissipative polypropylene
- Socks pass NFPA 99 standards for static decay and surface resistivity, making them perfect for fueling areas, solvent cleanup and in vehicle spill kits
- Floats to contain and clean up spills on water
- Flame-resistant material won't burn immediately like cellulose products; melts when exposed to high heat
- White colour makes it easier to see absorbed oil or fuels

pig

Specifications

Colour	White
Dimensions	ext. dia. 8cm x 3m L
Fluids Absorbed	Oil-Based Liquids But Not Water
Absorbency	Up to 57 L per box
Sold as	6 socks per box
Weight	8.6 kg
# per Pallet	16
Composition	Skin & Filler - Polypropylene

Technical Information

Certifications, Approvals and Ratings
