

PIG® Storm Drain Skimmer Squid

FLT012 38cm x 61cm, Absorbs up to 10.5 L per box, 2 each

Install a Skimmer Squid inside your storm drain catch basin as a passive last line of defense to capture oils, sheens and fuels from your stormwater runoff.

- Filters viscous and non-viscous oils, sheens and fuels from water collected inside your storm drain prior to outfall discharge
- 91cm diameter reach covers the largest area of any in-the-drain skimmer on the market
- Attached 2.7m line makes Skimmer Squid easy to deploy and retrieve; line can be adjusted to fit the depth of your catch basin
- Patent-pending design combines two unique absorbents to work above and below the surface of the water to maximize treatment efficiency
- Absorbent spaghetti-strip pillow (the "head" of the squid) floats to remove surface-level contaminants
- Absorbent pompom (the "tentacles") sweeps through moving water to capture oil below the surface
- Works effectively in standing water or turbid conditions during rain events
- Ideal last line of defense against lingering oils and sheens that get past other stormwater treatment measures at your facility
- When used with a PIG Storm Drain Filter, feed the squid's line through the overflow port and secure it to the nearest green strap or directly to the drain grate
- Can also be used as a standalone treatment option when tied directly to storm drain grate

Drain Shape	Round; Square; Rectangular
Substance Filtered	Oil
Use With	Storm Drains, Catch Basins, Storm Drain Filters

Style	Inside the Drain
Colour	White
Dimensions	ext. dia. 38cm x 61cm H
Absorbency	Up to 10.5 L per box
Sold as	2 per box
Weight	1.63 kg
New Pig Patent	Petent Pending
# per Pallet	90
Composition	Polypropylene
UV Resistant	Yes
