

PIG® Water-Activated Flood Bag

WTR044 30cm x 61cm x 6mm

Effortlessly place these super-absorbent flat bags that then swell up on contact with water, becoming a solid, heavy barrier to quickly dam and divert flooding.

- Stack these 61cm-long water-activated flood bags to create a retaining wall in flood-prone areas when water is coming
- Lightweight, compact and easy to handle before activated, unlike standard sandbags which are heavy, messy and labour-intensive
- Stack and stagger up to three rows high; build even higher retaining walls by using a pyramid layout
- Leave activated barriers in place for up to six months, as long as they stay saturated
- NOTE: Not for use with salt water and not to be driven over

Dimensions When Fully Saturated	30cm W x 60cm L x 7cm H When Fully Saturated
Height When Fully Saturated	7cm When Fully Saturated
Ideal For	Stacking, Retaining Walls
Weight When Fully Saturated	9kg each When Fully Saturated
Colour	Black
Dimensions	30cm W x 61cm L x 6mm H
Fluids Absorbed	Water-based liquids
Absorbency	Up to 87 L per package
Temperature Limit	Works from 0°C (32°F) to 82°C (180°F)
Sold as	10 per package
Weight	.83 kg
Composition	Polypropylene outer fabric; Super Absorbent Polymer (SAP) Pulp filler
Capacity	8.7ltrs per Bag
