

PIG® Water-Filled Containment Dike

PLR266 24cm x 7.6m

Keep washdown liquids in check with our economical water-filled containment dike. Rolls up for easy storage when you're done.

- Heavy-duty dike is durable, reusable and moldable; just place on ground and fill with water to create a gravity-based berm (not 100% watertight)
- Ideal for controlling and directing water from pressure washing operations (not for long-term containment of liquids)
- High-visibility orange dike helps prevent trips and falls during washdowns
- Convenient valve for quick filling and emptying

Specifications

Style	Non-Weight Bearing
Colour	Orange
Dimensions	24cm W x 7.6m L
Height When Full	8cm
Intended For	Smooth Surface
Temperature Limit	-29° C (-20° F) to 65.5° C (150° F)
Sold as	1 each
Weight	1.4 kg
Composition	18 ounce Vinyl w/Polyester Yarn Reinforcement; Steel reinforced ends
