

Rags In Bags

WIPE601 10 kg, 1 bag

For all-around rags, look no further than Rags In Bags! These recycled, white tee shirts work great for any general-purpose task, especially with solvents, which could cause coloured rags to bleed.

– Made out of recycled, post-consumer, cotton-rich T-shirts and hosiery
– Medium weight, low-lint material is ideal for staining, wiping, polishing or any other general-use application
– Highly absorbent; works will with oil, ink and paint
– Environmentally conscious products give old textiles a new life as strong and absorbent Rags, limiting the amount of textiles entering landfills
– All Rags are free of printing, metal content and areas of the garment that are not suitable for use such as cuffs and collars; every Rag is usable
– White colour is ideal for use with solvents, which might cause coloured rags to bleed
– Poly bag means there's no heavy packaging added into the final weight; you get more Rags than you would with box of equal weight
– Compression-packed to save storage space
– Typical industries include engineering, maintenance, glazing, automotive, paint manufacturing, post-paint polishing and printing

Style	Laundered Before Processing
