

Rags In Bags

WIPE605 10 kg, 1 bag

These Rags In Bags are perfect for a wide range of tasks. Low-lint white linen offers strength and durability and works great with solvents, which could cause coloured rags to bleed.

– Made out of recycled, post-consumer, cotton-rich table linen
– Strong, low-lint, absorbent material is ideal for polishing or any other application requiring durability
– Environmentally conscious products give old textiles a new life as strong and absorbent Rags, limiting the amount of textiles entering landfills
– All Rags are free of printing and metal content; every Rag is usable
– White colour is ideal for use with solvents, which might cause coloured rags to bleed
– Poly bag means there's no heavy packaging added into the final weight; you get more Rags than you would with box of equal weight
– Compression-packed to save storage space
– Typical industries include glazing, post-paint polishing, printing and car care

Style	Laundered Before Processing
Colour	White
Recycled Content	100% Post-Consumer Recycled Textiles
