

Sani-Trax™ Disinfectant Mat

FLME175 61cm x 81cm

Clean and sanitise shoes and prevent contamination from entering controlled areas with this disinfecting footbath - ideal for food processing entrances!

- Thousands of flexible fingers dislodge contaminants from footwear using automatic scrubbing action
- As traffic passes, rubber tips bend under pressure to immerse soles in disinfectant solution, keeping contamination from reaching food processing areas
- Thick surrounding border stands 6.5mm higher than finger-scrapers to contain up to 4.5 litres of disinfectant solution*
- Convenient mat size that fits most doorways features suction cups on underside to prevent mat from shifting
- Made from a tough natural rubber compound designed to resist to most chemicals and variations in temperature
- Use at doorways, packaging areas, laboratories, locker rooms, break rooms, refuse areas and receiving rooms - anyplace where spread of contamination must be limited

*Tip: use quaternary ammonium, iodine, chlorine or any other sanitiser but always test its concentration. Most sanitisers are concentrated and must be diluted before use in a footbath. Follow label directions for appropriate dilutions.

Specifications

Colour	Black
Dimensions	61cm W x 81cm L
Sold as	1 each
Weight	6.8 kg
Composition	100% natural rubber
