

Tough Lock Studded Modular Tile

FLME210 Not for Chemical Contact, For Light Oil/Grease Splash, 50cm x 50cm x 5mm

Studded Tough Lock Modular Tiles snap into place to protect floors and eliminate expensive, time-consuming concrete repair and coating. Flexible 5mm thick interlocking tiles can be easily dry laid over any hard surface with minimal preparation.

- Recommended for heavy duty use in dry industrial environments
- Constructed of 100% post-industrial recycled PVC, these tiles are durable enough to protect floors from the wear-and-tear from repeated foot and vehicle traffic, even most forklift truck use
- Tough Lock Modular Tiles can be installed into almost any configuration to protect nearly any size or shape floor
- Studded disk pattern channels away liquids for enhanced traction and safer footing; ideal for heavy and light industrial use like warehouses, production areas, loading docks and forklift battery charging areas, as well as commercial locations like showrooms, canteens and sports areas
- Ideal for covering damp, damaged, dusty or contaminated floors that would otherwise be difficult, time-consuming and expensive to repair
- Edges and Corner Edges (sold separately) add a finished bevelled edge that helps prevent trips and falls

Specifications

Dimensions	50cm W x 50cm L x 5mm H
Recycled Content	100% Post-Industrial Recycled PVC
Bevelled Edge	No
Grit Surface	No
Modular	Yes
Safe for Welding Areas	No
Sold as	1 each
Weight	2 kg

Composition	PVC
Application	Dry Applications
Chemical Contact	Not for Chemical Contact
Oil/Grease Contact	For Light Oil/Grease Splash
Static Dissipative	No
Water Contact	Non-Draining
