

Ultra X-Tex Mat

MATE4000 Heavyweight, 152cm x 15.2m, 1 roll

Ultra X-Tex Mat is designed for use as a durable, long-lasting geo-textile and filter media to absorb oil-based liquids but not water.

- Allows water to pass through while absorbing hydrocarbons, including petroleum, animal and vegetable oils
- When used as a filter medium, water passes freely, while absorption of target hydrocarbons begins on contact
- Absorbs up to 20 times its own weight of hydrocarbons
- Ideal for use in oil / water separators, storm water and waste water filtration systems, and water "polishing" applications
- Produced using recycled synthetic fibres into a lightweight fibre mass with enormous surface area and interstitial spaces, creating a high-performance absorbent and filter media
- Approximately 85-90% of absorbed oils can be reclaimed from Ultra X-Tex, before the mat can be reused
- Ultra X-Tex is environmentally and user-friendly; it does not leach harmful substances into the environment and when incinerated produces minimal residue or ash

Colour	Grey
Dimensions	152cm W x 15.2m L
Mat Weight	Heavyweight
Fluids Absorbed	Oil-Based Liquids But Not Water
Recycled Content	50% Post-Consumer Recycled Synthetic Fibers
Absorbency	Up to 197 L per roll
Perforated	Not Perforated
Sold as	1 roll
Weight	9.6 kg
# per Pallet	12

Composition	Polyester/Cotton recycled fibre blend
Packaging	Bag
Poly-Backing	No
UV Resistant	Yes
